

New Product Alert – Rigging Device

Counterweight Beam Sling 701878-1

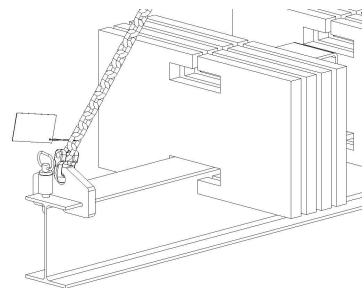

Saves significant rigging time and effort by locating current counterweight bar 8-0285 on roof deck or structure. Weights slide easily onto counterweight bar eliminating the need to lift weight higher than waist level.

- May reduce the number of counterweights needed when using OBSF A-11393 or Outrigger Gantries 701960-1 & 701960-2
- This product is not intended for use when flying weights to the roof with a crane or other overhead lifting applications.
- Heavy duty steel construction
- No tools required for installation
- Turnbuckle included
- Thorough labeling ensures worry-free installation
- Use with 8-0285 counterweight bar, found in 8-0217 series 5x5 outrigger assemblies
- Built by Spider in the USA

Load Rating: 2500 lbs

Weight: 16 lbs

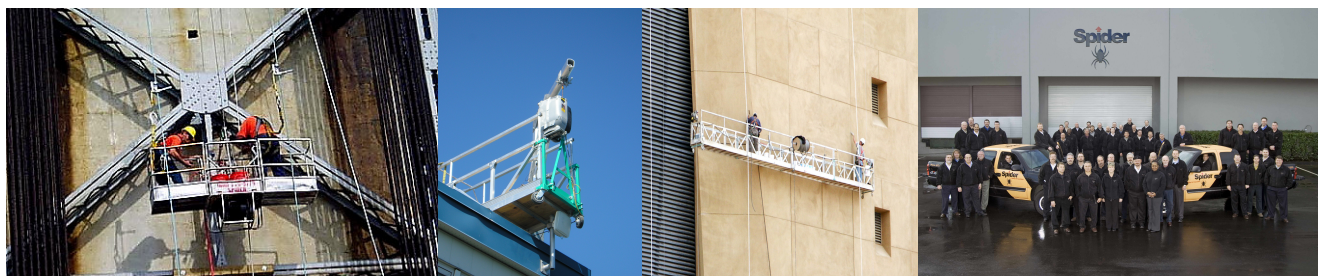

Install counterweights onto 8-0285 then slide sling onto ends of counterweight bar.

Final installation shown above, counterweights not shown.

8-0285 counterweight bar included in 8-0217-xx assembly
